

## **Rainier Therapeutics Announces Vofatamab Data Accepted for Presentation at 2019 American Society of Clinical Oncology (ASCO) Annual Meeting**

*-FIERCE-21 and FIERCE-22 Phase 2 Trials in Metastatic Bladder Cancer-*

**SAN LEANDRO, Calif., April 25, 2019**—Rainier Therapeutics, Inc., a privately-held clinical stage drug development company, today announced that abstracts related to trials of the company's lead therapeutic, vofatamab, have been accepted for presentation at the upcoming 2019 American Society for Clinical Oncology (ASCO) Annual Meeting, which will take place May 31 to June 4, 2019 in Chicago, Illinois.

"We are pleased to have abstracts related to our ongoing Phase 2 vofatamab trials accepted for a poster discussion and poster presentations at ASCO," said Scott Myers, Chairman and CEO of Rainier Therapeutics. "This includes a preliminary analysis of clinical activity in FIERCE-22 and an interim analysis in FIERCE-21."

Poster Discussion & Poster Presentation:

**FIERCE-22: Clinical activity of vofatamab (V) a FGFR3 selective inhibitor in combination with pembrolizumab (P) in WT metastatic urothelial carcinoma, preliminary analysis.**

Abstract: 4511

Poster Discussion Session: Genitourinary (Nonprostate) Cancer

Date/Time: Monday, June 3, 2019, 4:30 PM - 6:00 PM,

Location: Hall D2

Poster Session: Genitourinary (Nonprostate) Cancer

Poster Board: #337

Date/Time: Monday, June 3, 2019, 1:15 PM - 4:15 PM,

Location: Hall A

Presenter: Arlene O. Siefker-Radtke, MD, The University of Texas MD Anderson Cancer Center

Poster Presentation:

**Interim analysis of the FIERCE-21 phase 2 (P2) study of vofatamab (B-701), a selective inhibitor of FGFR3, as salvage therapy in metastatic urothelial carcinoma (mUC).**

Abstract: 4547

Poster Session: Genitourinary (Nonprostate) Cancer

Poster Board: #373

Date/Time: Monday, June 3, 2019, 1:15 PM - 4:15 PM

Location: Hall A

Presenter: Begona Mellado, MD, PhD, Hospital Clinic de Barcelona

**About Vofatamab**

Vofatamab (formerly B-701) is an antibody specifically targeted against the fibroblast growth factor receptor 3 (FGFR3), a known driver of bladder and potentially other FGFR-driven cancers. Vofatamab is the most advanced targeted antibody specific for FGFR3 known by Rainier Therapeutics to be in clinical development. Vofatamab is currently being evaluated in two clinical trials: FIERCE-21 and FIERCE-22.

FIERCE-21 is a Phase 2 trial evaluating vofatamab in combination with docetaxel and separately vofatamab as monotherapy in patients with locally advanced or metastatic bladder cancer with FGFR3 mutation/fusions who have relapsed after, or are refractory to, at least one prior line of chemotherapy.

FIERCE-22 is a Phase 2 trial evaluating vofatamab in combination with pembrolizumab, an immune checkpoint inhibitor, to determine safety, tolerability and efficacy in the treatment of patients with locally advanced or metastatic bladder cancer, who have progressed following platinum-based chemotherapy and who have not received prior immune checkpoint inhibitor therapy.

For additional information on FIERCE-21, please visit [www.clinicaltrials.gov](http://www.clinicaltrials.gov) (NCT02401542) and for more information on FIERCE-22, please visit [www.clinicaltrials.gov](http://www.clinicaltrials.gov) (NCT03123055).

Rainier Therapeutics also plans to study vofatamab in non-muscle invasive bladder cancer (NMIBC) – the FIERCE-23 trial.

**About Rainier Therapeutics**

Rainier Therapeutics, Inc. is a privately-held, clinical stage biotechnology company developing a targeted biologic for the potential treatment of metastatic bladder cancer. The company's antibody, vofatamab (formerly B-701) is focused specifically on the fibroblast growth factor receptor 3 (FGFR3), a known driver of bladder and other cancers.
